

VICMESH OHSMS NO. 3 ENVIRONMENTAL SUSTAINABILITY MANAGEMENT POLICY.

It is the purpose of this policy to ensure that all reasonable and practicable measures are taken to protect the environment from contamination or damage as a result of any works undertaken.

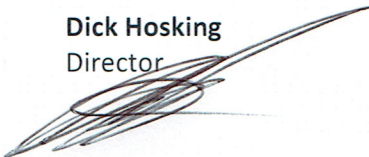

It is the purpose of this policy to comply with all applicable environmental laws and regulations in a commercially effective way and to monitor and review its performance on a regular basis.

PROCEDURE:

VICMESH is committed to:

- 1 Operating practices which seek to minimise environmental impacts in a commercially effective way through work and management practices, training and the use of new technology.
- 2 Implementing a Waste Management Plan designed to minimize wastes, develop viable recycling opportunities and ensure that proper waste handling and disposal methods are followed.
- 3 Product development that seeks to combine commercial viability and improved environmental attributes, and which encourages efficient use and conservation of resources.
- 4 Environmental assessment of new projects, asset purchases, and regular assessment of the environmental impact of existing operations.
- 5 Environmental impact responses that includes contingency planning and proper responses to minimise and environmental risks.
- 6 Communication with employees and consultation with governments, authorities, local communities, customers, contractors and industry groups where there are matters of common concern relating to the environment.
- 7 Concern and respect for the environment will be encouraged and will emphasize every employee's responsibilities for environmental performance.
